- Angled Grooves Create Air Pockets and Provide a Slicker Surface
- Will Not Slow Your Boat Down

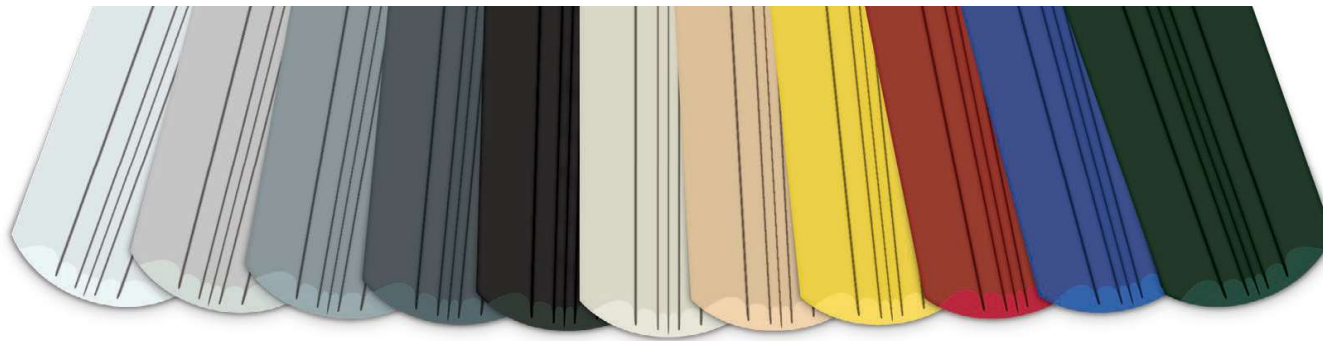

- **Protect Against Abrasive Sand, Rocks, Concrete Ramps, and Oyster Beds**
- **Eliminate Costly Repairs**
- **Enjoy the Highest Quality and Superior Engineering**
- **Increase the Value of Your Boat**

Wear and damage to your boat's keel can break down its protective gelcoat finish, allowing water to reach and destroy the fiberglass laminates. Megaware KeelGuard, the powerful abrasion-resistant protector, prolongs the life of your boat like nothing else.

## Megaware KeelGuard Patented Engineering

Every aspect of the patented Megaware KeelGuard has been designed with boat designers and 3M® engineers. Many factors contribute to its success. A precise, abrasive-resistant blend of polymers and urethanes achieve optimal durability and pliability. A pressure-sensitive adhesive creates strength, while permanently bonding and sealing Megaware KeelGuard's contoured edges to the hull surface. Angled grooves produce hydrodynamic channels, creating air pockets and providing a slicker surface. The perfect combination of these factors makes the Megaware KeelGuard the easiest keel protector to install, and gives it unparalleled quality and dependability.

## Trusted Protection

As seen on Ship Shape TV and featured on Aaron Martin's Bass Edge Podcast, Megaware KeelGuard is the choice of boat hull protection by many professional fishermen and is installed on every Major League Fishing boat.

Megaware KeelGuard has been protecting watercraft of all kinds, including recreational boats, fishing boats, dinghies, rigid inflatables, and coast guard fleets.

**Product Width: 5"**

## Do-It-Yourself Easy Application in 4 Basic Steps

Installs Easily in an Hour or Less

- 1 **ETCH** with Scotch-Brite Pad
- 2 **CLEAN** with Alcohol
- 3 **PRIME** with 3M Primer
- 4 **APPLY** with Burnishing Tool

**Note:** If your trailer is designed with the boat resting on center rollers or a support beam along the keel, we do not recommend installing a keel protector. If the rollers can be lowered or the side bunks raised to clear the roller, the Megaware KeelGuard adhesive bond will not be compromised. The Megaware KeelGuard is not suitable for some aluminum boats, pontoons, catamarans, personal watercraft, or boats with a non-standard V shaped keel. Please call for suitability.

*"I would just like to compliment you on your clear instructions and a wonderful product. I installed it in about 45 minutes, and it truly looks as if it were part of the original manufactured vessel."*
